

Obtaining Informed Consent for Clinical Research

SingHealth Research Integrity, Compliance and Ethics (RICE) will be hosting a webinar to share the requirements in obtaining informed consent for clinical research.

We are Study Team Members delegated to obtain informed consent for a clinical research. **Is obtaining Research Consent the same as Clinical Consent?**

Thank you. We will take note of the Research Consent requirements when recruiting subjects.

Obtaining Research Consent **has some differences** from Clinical Consent.

Research Consent has to follow specific requirements such as ICH-GCP, Human Biomedical Research Act (HBRA), Health Products Act or Medicines Act.

Webinar Highlights:

- SingHealth Requirements for obtaining Research Informed Consent
- Applying Thumbprints, Legal Representative (LR) & Witness in the Informed Consent Process

11 JANUARY 2022 (TUE)
12:00 PM – 1:00 PM
