

Innovations in Behavioural and Implementation Science for Healthcare: Adding Value and Reducing Unwarranted Variation

10th October 2022, Monday
11.30am - 12.30pm SGT
2.30 - 3.30pm AEDT

Register Now

Host and Moderator

**Associate Professor
Robyn Mildon**

Visting Associate Professor, Yong
Loo Lin School of Medicine,
National University of Singapore

Executive Director, Centre for
Evidence and Implementation (CEI),
Singapore/Australia/UK

Panel

Professor Jill Francis

Professor, Implementation Science,
School of Health Sciences, The
University of Melbourne

Implementation Science Lead,
Department of Health Services
Research, Peter MacCallum Cancer
Centre, Melbourne

**Associate Professor
Tan Cher Heng**

Executive Director, Centre for
Healthcare Innovation

Senior Consultant, Department of
Diagnostic Radiology, Tan Tock Seng
Hospital

Assistant Chairman Medical Board,
Clinical Research and Innovation, Tan
Tock Seng Hospital

Webinar Programme and Speakers' Profiles Here

About the Webinar Series

Translating evidence-based interventions into policy and practice requires both behavioural and implementation science to create and embed effective and sustainable long-term improvements in healthcare outcomes. This webinar series aims to engage policy makers, organisational leaders, researchers and healthcare professionals on the use of behavioural and implementation science in the real-world setting to improve the quality and delivery of healthcare services.

About BISI

The Centre for Behavioural and Implementation Science Interventions (BISI) was established at the NUS Yong Loo Lin School of Medicine (NUS Medicine) in 2019. Our international team of experts aims to improve population health and well-being by accelerating evidence-based practice through the use of behavioural and implementation science. BISI works with policy makers, organisational leaders, researchers, practitioners and providers to design, implement and evaluate transformative healthcare policies and programmes to deliver and sustain better healthcare outcomes. BISI complements existing teaching and research at the Yong Loo Lin School of Medicine, bringing a rigorous new focus on the behavioural and implementation factors that influence health and healthcare in Singapore and beyond.
