

Duke-NUS Approved Research Mentor List

An **approved mentor** takes primary responsibility of the mentee during the latter's research experience.

A **NEWLY approved mentor** takes primary responsibility of the mentee during the latter's research experience, but is expected to identify a senior approved mentor who will oversee the mentoring process.

We strongly encourage you to select a mentor who is a **Clinician Scientist (CS)**. The CS mentors are highlighted in **bold and** marked with an **asterisk (*)** below. These mentors have been or are currently Principal Investigator (PI) of national-level or cluster-level grants.

If you still wish to work with a non-CS mentor as your primary mentor, you will need to seek a CS co-mentor to provide input on your research and career aspirations.

Duke-NUS Approved Research Mentor List

An **approved mentor** takes primary responsibility of the mentee during the latter's research experience.

A **NEWLY approved mentor** takes primary responsibility of the mentee during the latter's research experience, but is expected to identify a senior approved mentor who will oversee the mentoring process.

We strongly encourage you to select a mentor who is a **Clinician Scientist (CS)**. The CS mentors are highlighted in **bold and** marked with an **asterisk (*)** below. These mentors have been or are currently Principal Investigator (PI) of national-level or cluster-level grants.

If you still wish to work with a non-CS mentor as your primary mentor, you will need to seek a CS co-mentor to provide input on your research and career aspirations.
