Prescription medication labels (PMLs) in Singapore

Public and private clinics and hospitals dispense prescription medications with **pharmacy generated labels** that provide medication-related information and instructions for patients

Pharmacist

Clinic Assistant

Frontier Healthcare; Mediacorp (images)

Actual PMLs from public and private providers

Key medication information (and patient and clinic details)

- drug name, dose, quantity dispensed
- dosage and route
- indications
- precautions and side-effects (if any)

- Variable format and presentation
- **English is the commonly used language**

Understanding of PMLs is important – especially among older persons

- Essential for proper medication adherence and patient safety
- Incorrect understanding ~ related to increased healthcare utilization (outpatient)
- Increased healthcare utilization with age = **Older persons** are more likely to receive prescription medications (vs younger)
- **Older persons** are more likely to interpret medication labels incorrectly
- Ensuring understanding of prescription medication labels:
 - Empowers **older persons** for self-care
 - Enables **older persons** to take responsibility for own medication, supporting higher-level functioning (i.e., an Instrumental Activity of Daily Living)

PMLs are the principal source of medication information for **older persons (in Singapore)**

Key adjunct to medication counselling

Increasing proportion of older persons living alone

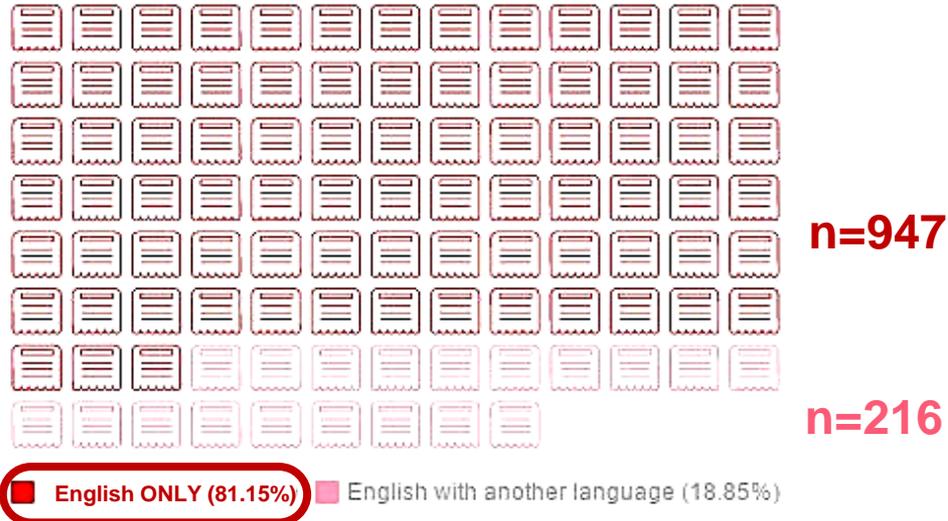

Do they use the internet to access medication information?

PMLs of older Singaporeans on regular prescription medications

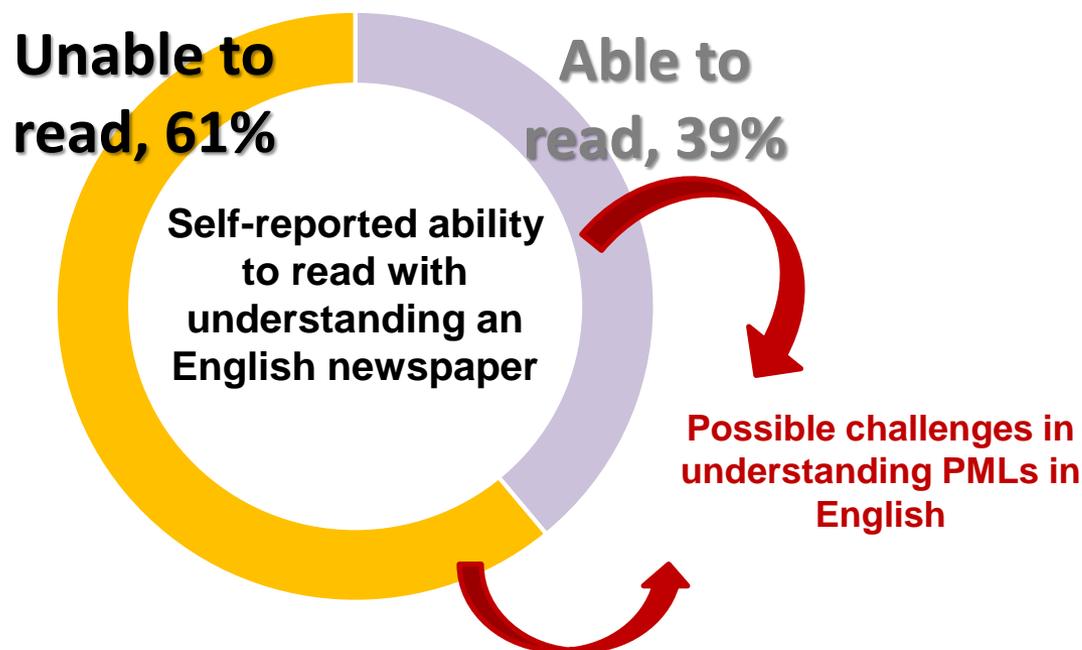

SAFE-PHASE examined 1,167 prescription medication labels
99.7% used the English language (with or without any other language)

Language used in medication instructions

SAFE-PHASE, Singapore Assessment for Frailty in Elderly - Building upon the Panel on Health and Aging of Singaporean Elderly | Created with Piktochart

Many Singaporeans aged 65 years and older are unable to read English

Does difficulty in understanding written information on PMLs matter?

Mediators of the association of limited English health literacy with medication non-adherence among Singaporean elderly

 - Prescription Medication Label Improvement for Singaporean Elderly (PROMISE)

Some strategies for improving understanding of PMLs

Multilingual instructions

- Adults with limited English proficiency
- Benefit for care provider and patients
- Effective communication of product use information
- Improved product knowledge
- Improved mean scores for ease of use

Pictograms

- Low literate and elderly populations
- Use in combination with written text
- Requires proper cultural adaptation and validation in the target population

Can these strategies help older Singaporeans in understanding PMLs?

Aim

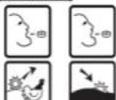

To compare the understanding* of PMLs among older Singaporeans *randomized* to 1 of 4 prototype labels, which contain the same medication information and instructions but vary in their use of an additional language along with English and/or pictograms

**Based on the response to a standard set of questions*

Prototype	Three medication labels (Augmentin, Metformin and Phenytoin) with the same information and instructions provided in:
ET label	English Text
ETP label	English Text <u>with</u> FIP Pictograms
BLT label	Bi-Lingual Text (i.e., English with Chinese or Malay or Tamil)
BLTP label	Bi-Lingual Text (i.e., English with Chinese or Malay or Tamil) <u>with</u> FIP* Pictograms

FIP, International Pharmaceutical Federation

Label 1: AUGMENTIN, and questions

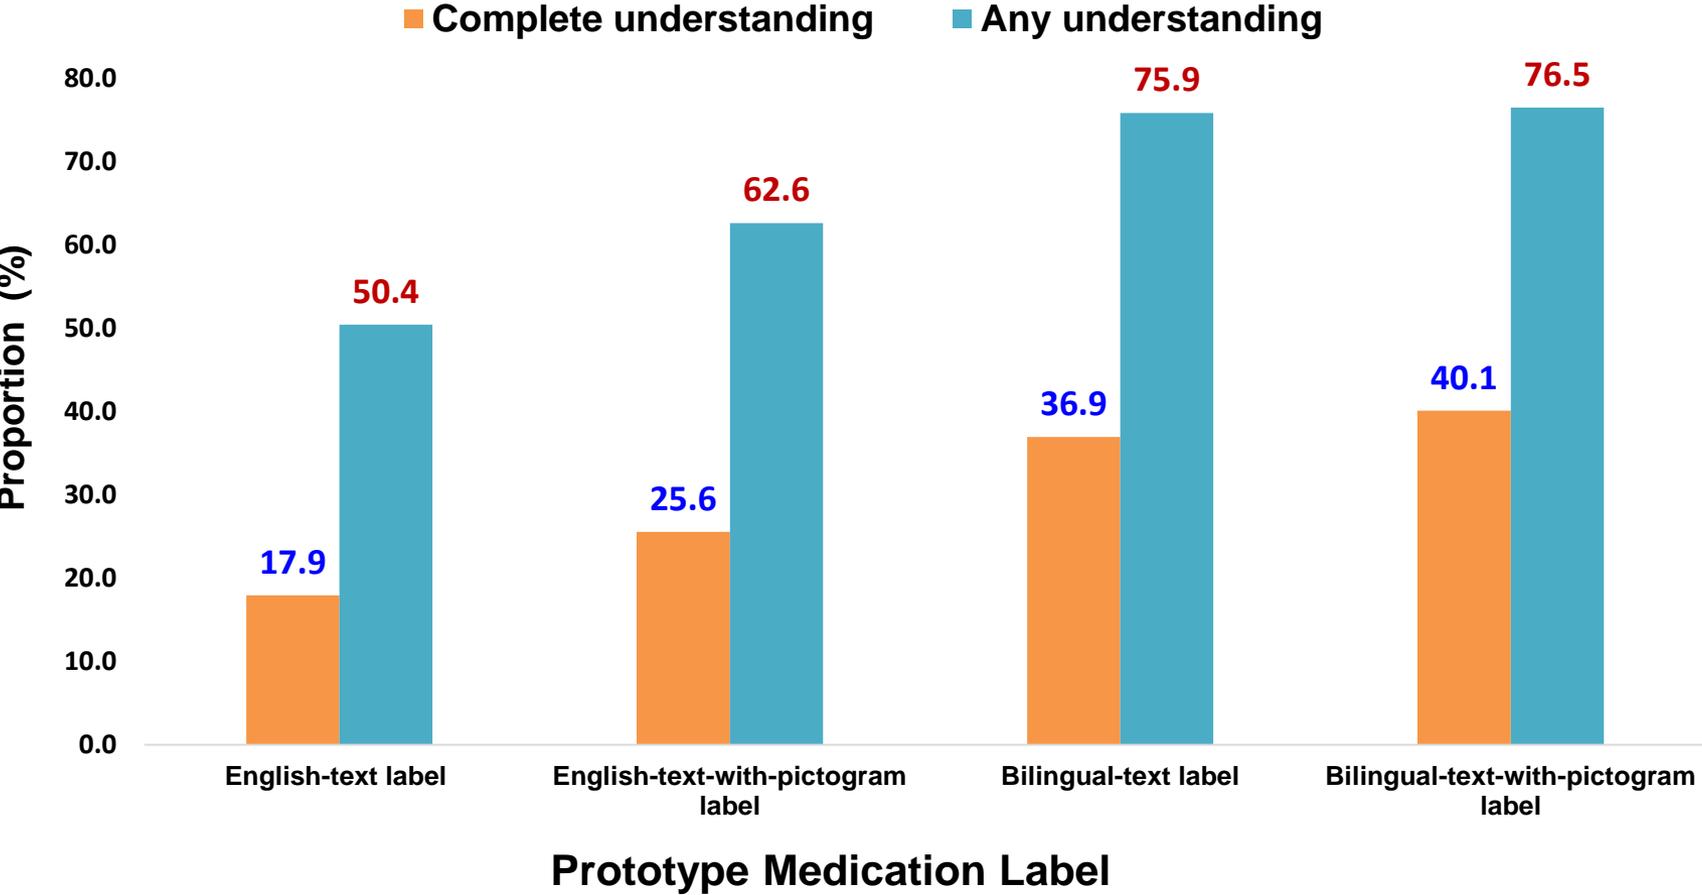

<p>KEEP AWAY FROM CHILDREN</p> <p>10 TABLETS CLAVU 125mg, amox 500mg TAB (AUGMENTIN)</p> <p>TAKE 1 TABLET 2 TIMES A DAY</p> <p>Take with or after food.</p> <p>Consult doctor if rashes develop.</p> <p><small>XYZ Clinic, Singapore</small></p>	<p>KEEP AWAY FROM CHILDREN</p> <p>10 TABLETS CLAVU 125mg, amox 500mg TAB (AUGMENTIN)</p> <p>TAKE 1 TABLET 2 TIMES A DAY</p>  <p>Take with or after food.</p>  <p>Consult doctor if rashes develop.</p> <p><small>XYZ Clinic, Singapore</small></p>
<p>English-text label</p>	<p>English-text-with-pictogram label</p>
<p>KEEP AWAY FROM CHILDREN 小心放置，以免儿童误服</p> <p>10 TABLETS 10 粒 CLAVU 125mg, amox 500mg TAB (AUGMENTIN)</p> <p>TAKE 1 TABLET 2 TIMES A DAY 每日 2 次，每次 1 粒</p> <p>Take with or after food. 饭时或饭后服药。</p> <p>Consult doctor if rashes develop. 如服药后身体出现皮疹，与医生联络。</p> <p><small>XYZ Clinic, Singapore</small></p>	<p>KEEP AWAY FROM CHILDREN 小心放置，以免儿童误服</p> <p>10 TABLETS 10 粒 CLAVU 125mg, amox 500mg TAB (AUGMENTIN)</p> <p>TAKE 1 TABLET 2 TIMES A DAY 每日 2 次，每次 1 粒</p>  <p>Take with or after food. 饭时或饭后服药。</p>  <p>Consult doctor if rashes develop. 如服药后身体出现皮疹，与医生联络。</p> <p><small>XYZ Clinic, Singapore</small></p>
<p>Bilingual-text label</p>	<p>Bilingual-text-with-pictogram label</p>

Augmentin

Assume that your doctor prescribed a medication for you that you received in a packet with this label.

Q1	<p>How many times a day do you have to take this medication?</p> <p>_____ times / Don't know / Not sure</p>
Q2	<p>How many tablets do you have to take each time you take this medication?</p> <p>_____ tablets / Don't know / Not sure</p>
Q3	<p>If you were to take this medication correctly as prescribed by the doctor, how many days will your medication last?</p> <p>_____ days / Don't know / Not sure</p>
Q4	<p>Assume that you took the first dose of this medication at 8 o'clock this morning. About what time, or when, should you take the next dose?</p> <p>_____ / Don't know / Not sure</p>
Q5	<p>For which specific side effect of this medication should you consult a doctor?</p> <p>_____ / Don't know / Not sure</p>

Proportions of older persons with *complete understanding* and *any understanding*, by label

Conclusion

- Adding another **preferred official language** and/or **pictograms** to 'usual practice' purely English text PMLs will **enhance** their **understanding** among elderly Singaporeans

Recent prescription medication packets in Singapore

If you feel unwell after taking the medicine, please consult your doctor or pharmacist.

	Morning Pagi	早上 காலை	Tablet/s Biji மாத்திரை
	Afternoon Tengahari	中午 மதியம்	Tablet/s Biji மாத்திரை
	Evening Petang	傍晚 மாலை	Tablet/s Biji மாத்திரை
	Night Malam	晚上 இரவு	Tablet/s Biji மாத்திரை

Half To One Hour Before Food
餐前半至一小时服用
சாப்பாட்டிற்கு அரை மணி நேரத்திலிருந்து ஒரு மணி நேரத்திற்குள்

Immediately Before Food
餐前服用
சாப்பாட்டிற்கு முன் உடனடியாக

时间 MASA TIME நேரம்	 早上 PAGI MORNING காலை	 中午 PETANG AFTERNOON நடைகால	 傍晚 SENJA EVENING மாலை	 晚上 MALAM NIGHT இரவு
服用 CARE TAKEN சாப்பிடவும்	<input type="checkbox"/> 饭前半/一小时 Setengah/satu jam sebelum makan Before Food 1/2 Hour/1Hour அரை மணி/ஒரு மணி நேரம் ஆகாமல் சாப்பிடுமுகுள்		<input type="checkbox"/> 饭后即刻服 Selepas makan Immediately After Food சாப்பிட்ட பிறகு	

• Caution! Do not exceed the stated dose
• Keep medicines away from children
• Keep medicines away from heat and light

Conclusion

- Adding another **preferred official language** and/or **pictograms** to ‘usual practice’ purely English text PMLs will **enhance** their **understanding** among elderly Singaporeans
- Low proportions (<50%) with ***complete understanding*** across all prototypes ~ more careful assessment of **other issues related to label design and content**
- Pictograms helped?
 - **“Bilingual Text and Pictogram”** label had the **highest proportion** of elderly with ***complete*** and ***any understanding***, *but* it was similar to that for the “Bilingual Text” label and much higher than the “English Text and Pictogram”.
 - **Local adaptation of the FIP pictograms**

Prescription Medication Label Improvement for Singaporean Elderly (PROMISE)

Further investigation on prescription medication labels for elderly Singaporeans – ONGOING

Funding: Ministry of Health, Singapore sub-award through Centre for Ageing Research and Education (CARE), Duke-NUS Medical School, Singapore for S\$ 814,816 (PI: Rahul Malhotra)

PROMISE (Prescription Medication Label Improvement for Singaporean Elderly) study group (listed alphabetically, after the Principal Investigator):

Rahul Malhotra (Principal Investigator; Centre for Ageing Research and Education, Duke-NUS Medical School, Singapore and Health Services and Systems Research, Duke-NUS Medical School, Singapore); **John Carson Allen** (Centre for Quantitative Medicine, Duke-NUS Medical School, Singapore); **Ang Wee Ping** (Clinic Pharmacy, SingHealth Polyclinics, Singapore); **Bek Siew Joo Esther** (National Healthcare Group Pharmacy, Singapore); **Chan Alexandre** (Department of Pharmacy, Faculty of Science, National University of Singapore, Singapore and Department of Pharmacy, National Cancer Centre, Singapore); **Chew Lita Siu Tjien** (Department of Pharmacy, Faculty of Science, National University of Singapore, Singapore and Department of Pharmacy, National Cancer Centre, Singapore); **Koh Choon-Huat Gerald** (School of Public Health, Saw Swee Hock School of Public Health, National University of Singapore, Singapore); **Lee Ting Yee** (Clinic Pharmacy, SingHealth Polyclinics, Singapore); **Sumithra Suppiah** (Centre for Ageing Research and Education, Duke-NUS Medical School, Singapore); **Tan Ngiap Chuan** (Department of Research, SingHealth Polyclinics, Singapore); **Tan Shu Ying Valerie** (National Healthcare Group Pharmacy, Singapore); **Tan Yi Wen** (Centre for Ageing Research and Education, Duke-NUS Medical School, Singapore); **Tang Imel** (Clinic Pharmacy, SingHealth Polyclinics, Singapore); **Tang Wern Ee** (National Healthcare Group Polyclinics, Singapore); **Tay Siew Cheng Sarah** (Clinic Pharmacy, SingHealth Polyclinics, Singapore); **Régis Vaillancourt** (Department of Pharmacy, Children's Hospital of Eastern Ontario, Canada); **Csilla Weninger** (National Institute of Education, Nanyang Technological University, Singapore)

PROMISE

GOAL: To provide the evidence-base for developing and implementing easily understood, context- and culturally-appropriate PMLs for older Singaporeans

AIM 1: Document the experience of older patients, their family caregivers, and healthcare providers (pharmacists/pharmacy technicians in public polyclinics) with PMLs from primary healthcare clinics in Singapore

AIM 2: Assess the validity of the FIP pictograms among older Singaporeans, and if needed, adapt the FIP pictograms (or develop new pictograms) to the Singapore context

AIM 3: Assess the validity of the 're-designed' FIP pictograms (or new pictograms) among older Singaporeans

AIM 4: Quantify the preferences of older Singaporeans for the content and format of PMLs

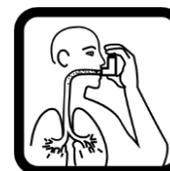

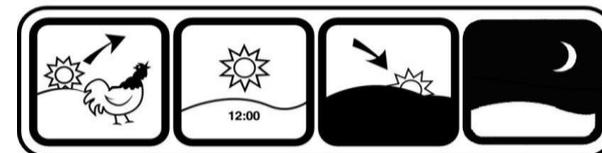

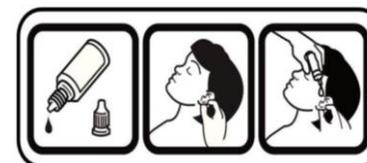

AIM 5: Enable the implementation of improved PMLs

PROMISE *AIM 1*: Experience with PMLs - Conclusion

- **Strong need to improve current PMLs**
 - Older Singaporeans (and their caregivers) experience difficulties reading and obtaining desired medication information from PMLs
 - “Ad-hoc” solutions by pharmacy staff
- **Older Singaporeans, and their caregivers, voiced several PML improvements**
 - **Format:** Larger **font**; Dose in **numeric** (vs text); **Tabular** presentation of dose and frequency; Presentation of dose and frequency in context of **time of the day** (than times per day); **List** / Better **spacing** instead of a lump of text; Bilingual text; **Pictograms**
 - **Content:** Simpler language; Indication; Expiry date; Food instructions; Missed dose instructions

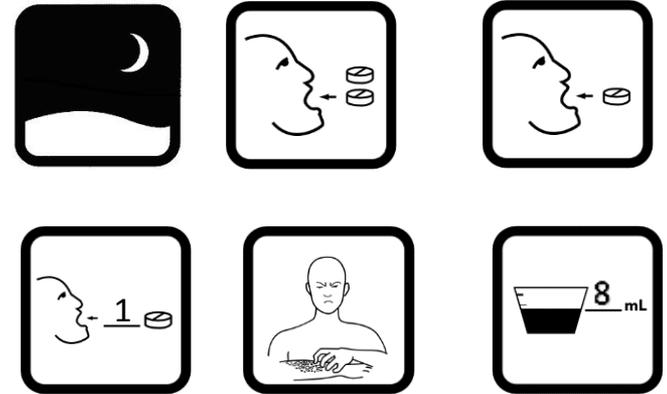

PROMISE AIM 2 : Pictogram validation - Results

	PICTOGRAM	% Consolidated transparency scores [Ref.: ≥66.7%]	% Consolidated translucency scores that are ≥5 [Ref.: ≥85%]

23	Ringing in ears	17.6	66.7
24	Difficulty in breathing	17.3	48.1
25	Apply to affected area	15.7	64.7
26	Tremors or Shaky hands	13.7	43.1
27	Take on empty stomach	9.8	58.0
28	Confusion	7.8	54.9
29	Difficulty in sleeping	3.9	54.9
30	Take until finished	0.0	51.0

Not valid for use locally!

26 of the 30 pictograms for **re-design**, resulting in
Singapore-specific pictograms.

PROMISE *AIM 2* : Pictogram validation - Conclusion

- Majority of the tested FIP pictograms (61.5%) did not achieve validity ($\geq 66.7\%$ comprehensibility), highlighting **the need for contextual validation of pharmaceutical pictograms prior to use.**

SUMMARY

- **Need to improve current PMLs**
- Adding another **preferred official language** and/or pictograms to 'usual practice' purely English PMLs will enhance their understanding among elderly Singaporeans
- Need for **contextual validation of pictograms** prior to use
- Other label format and content features - have to be considered
- Opportune time - National Pharmacy Strategy (redesigned, standardized labels?)
