New Horizons in

Academic Medicine

SingHealth Duke-NUS OBGYN
Academic Clinical Programme (ACP)
Progress Report 2015

ACCELERATING OUR MOMENTUM IN ACADEMIC MEDICINE

Prof Ivy Ng
Group CEO,
SingHealth

The journey of Academic Medicine has been both exciting and challenging, as we have embarked on this once-in-a-lifetime opportunity that allows us to challenge medical boundaries and chart new horizons through research and innovation and be at the forefront of enhancing quality care and service for our patients. Medical education is also one of the driving forces behind healthcare as the future of medicine lies in training and nurturing Singapore's future healthcare professionals.

During the SingHealth Duke-NUS Obstetrics and Gynaecology Academic Clinical Programme (OBGYN ACP) Townhall session, several key initiatives were shared that have been developed and spearheaded in the field of Obstetrics and Gynaecology. The success of OBGYN ACP is defined not only by their own achievements but also by their commitment towards building a lasting legacy of healthcare rooted in delivering quality clinical care, educating a strong talent pipeline and pursuing cutting edge research.

As we continue to raise the standard of innovation and research, philanthropy enables more to be done for the community and the academic work. OBGYN ACP has successfully tapped on various channels like SingHealth Duke-NUS Gala Dinner and Great Eastern Women's Run, to engage prospective donors to raise funds that support medical research and education in women's health.

Our relentless pursuit of academic medicine is driven by our ardent commitment to create a vibrant academic culture that takes us into new areas of discovery, with the potential to shape future clinical outcomes that will make a real and lasting difference for our patients.

Prof Thomas Coffman
Dean-Designate,
Duke-NUS

Like other superb Academic Medical Centres in the world, SingHealth Duke-NUS Academic Medical Centre aims to transform patient care delivery, by incorporating research to promote clinical innovation, and providing high level medical education and training.

OBGYN ACP has always been at the forefront of medical education aspiring to nurture new generations of healthcare professionals and empowering them to shape the future of healthcare. SingHealth Duke-NUS OBGYN ACP Education Day is a dedicated platform for cross sharing of educational projects and initiatives, spearheaded by our clinician-educators. The OBGYN ACP has obtained grant support to establish a regional training centre that promotes knowledge exchange and sharing in areas like Obstetrics, Gynaecological Laparoscopy and Surgical Complications, Advanced Fetal Therapy and Fetoscopy, and Colposcopy and Management of Pre-Invasive Disease of the Genital Tract. Moreover, as a University-affiliated unit, OBGYN ACP is also committed in providing both undergraduate and post-graduate training in a wide range of disciplines. Their programme has been consistently ranked highly as the first choice in Singapore for OBGYN training.

We are making marvelous progress in our academic endeavours. Let us remain undaunted and united in our common purpose of advancing medicine by continuing to make breakthroughs in education and research, in search of a better tomorrow for our patients.

**Adj Assoc Prof
Bernard Chern Su Min**
Academic Chair,
OBGYN ACP

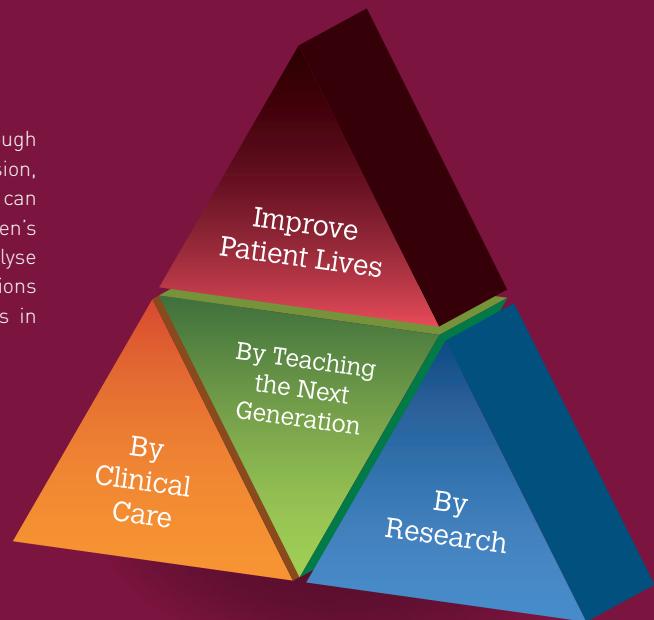

In SingHealth Duke-NUS Obstetrics and Gynaecology Academic Clinical Programme, our distinctive ability to work in partnership with SingHealth Duke-NUS to integrate education, research and clinical practice has allowed us to be the leading healthcare provider in the region. We have made tremendous progress in advancing our Academic Medicine Vision as we harness on the collective strengths of both KKH Division of O&G and SGH Department of O&G. As we continue to promote academic medicine through various integrated platforms like Education Day, Research Day as well as Clinical Practice Improvement day, both institutions have many cross-collaborations opportunities, thereby allowing the power of shared knowledge and resources to be greatly maximized and new initiatives to be borne.

Let us continue to spur one another as we advance as one in this transformational academic medicine journey. I hope that all of our healthcare professionals, staff and the whole community will continue to support this ground-breaking partnership as we strive towards being at the forefront of medicine to set new healthcare standards, along with transforming and implementing models of care.

SHARED MISSION

The OBGYN ACP has a mission to improve lives of patients through excellent clinical care, education and research. To fulfil this mission, team work is paramount as no single individual or department can work alone. The OBGYN ACP comprises clinicians from KK Women's and Children's Hospital and Singapore General Hospital. To catalyse cross-fertilization of ideas and sharing of resources, collaborations are constantly forged between institutions to achieve our goals in Academic Medicine.

“ To deliver excellent O&G Services, Education and Research in order to ensure world class clinical outcomes. ”

Annual retreat group photo taken at Resorts World Sentosa Convention Centre

21 March 2015 – SingHealth Duke-NUS OBGYN ACP Retreat 2015

The annual retreat serves as a platform for ACP Key Appointment Holders (KAHs) to review past year's achievements and share on the strategic planning for the organization with fellow faculty and staff. The retreat was enjoyable and productive as faculty and staff from both KKH and SGH shared on various interesting insights on how OBGYN ACP can continue to advance and build on the collective strengths of SingHealth and Duke-NUS thereby leading to the creation of an even more vibrant academic culture.

9 July 2015 – SingHealth Duke-NUS OBGYN ACP Townhall

OBGYN ACP held its townhall session with Prof Ivy Ng (Group Chief Executive Officer) on the 9th July 2015 at the KKH Auditorium. The invited guests included Prof Soo Khee Chee (Deputy Group Chief Executive Officer), Prof Fong Kok Yong (Group Director for Medicine), Assoc Prof Tan Say Beng (Group Director for Research), Prof Kenneth Kwek Yung Chiang (Chief Executive Officer for KKH), Prof Alex Sia Thiong Heng (Chairman of Medical Board for KKH), Assoc Prof Bernard Chern Su Min (Academic Chair for OBGYN ACP) and Assoc Prof Tan Hak Koon (Deputy Academic Chair for OBGYN ACP).

Assoc Prof Bernard Chern Su Min presented on the overview of the initiatives and activities that OBGYN ACP had developed and implemented as well as the performance of Division of O&G. Other presentations included Dr Tan Eng Loy, Department of O&G, SGH, who presented on the progress and challenges of the Emergency Obstetrics Course. Our SingHealth Residents, Dr Ku Chee Wai and Dr Sharon Foo Anqi shared on their training and experiences as OBGYN Residents. Lastly, Dr Sonali Chonkar, Division of O&G, KKH, shared on the different learning approaches amongst medical students.

The townhall ended on a positive note with a panel discussion consisting of SingHealth Senior Management. The panel discussion served as a platform for our staff to raise their concerns and questions. The event was well attended by doctors, nurses, allied health professionals as well as administrators.

25 July 2015 - OBGYN Residency Open House 2015

The SingHealth Residency Open House is an annual event where prospective residents exposed themselves to different specialty training programmes offered by SingHealth. The open house was abuzz with excitement and activities and drew a huge crowd of over 500 medical students. OBGYN Residency Program Director, Faculty and Residents were on hand to share information about our programme as well as provided insights based on their personal experiences. It was a fruitful day for everyone as medical students got a chance to learn more about the specialties they were interested in.

Residents sharing on their clinical improvement project

14 August 2015 - 3rd SingHealth Duke-NUS OBGYN ACP Clinical Practice Improvement Day

The Clinical Practice Improvement Day is an annual event that provides a platform for clinicians to discuss ways to enhance clinical practice and improve patient safety. It gives clinicians an opportunity to glean invaluable insights from lectures and projects.

The seminar included an interesting talk by Mr Maurice Cheong on Application of Bolam Test and Post-Bolam in Medical Treatment, Informed Consent and Causation. Dr Joseph Gomez shared on Reducing Medical Errors and Dr Chow Mun Hong delivered an interesting presentation on Overview of SingHealth's Updates and Strategy on SingHealth's Quality and Innovation.

The seminar received an excellent turnout. Many of the attendees expressed that they had benefitted greatly and they look forward to attending next year.

30 August 2015 - SingHealth Duke-NUS Gala Dinner

The SingHealth Duke-NUS Gala dinner, held on 30th August at The Ritz-Carlton, was well attended by clinicians, researchers, educators and donors. Deputy Prime Minister and Finance Minister, Mr Tharman Shanmugaratnam, graced the event as Guest-of-Honour.

The dinner marked a special milestone as SingHealth celebrated a decade of partnership in Academic Medicine with Duke-NUS Medical School. The Academic Medical Centre, harnesses the collective synergies of education and research to advance the frontiers of medicine, thereby allowing patients' lives to be improved.

OBGYN ACP raised a record donation of \$313,000 through various avenues like table sales, painting auctions donated by our grateful patient and her artist friends, Lee Foundation, as well as the partnership with Great Eastern Women's Run.

1 November 2015 - SingHealth Duke-NUS OBGYN ACP and Great Eastern Women's Run

SingHealth Duke-NUS OBGYN Academic Clinical Programme is happy to partner Great Eastern Women's Run 2015 as one of three beneficiaries raising a total of \$120,000. The amount raised towards OBGYN ACP will go into supporting medical research and education in women's health.

The Guest-of-Honour, Ms Grace Fu, Minister for Culture, Community and Youth was there at the cheque presentation and commented "We would like to see more corporates step up not just to promote healthy living, but also to do a good social cause. So, in this case with the efforts of the runners and Great Eastern, we managed to raise a substantial amount for three charities."

Assoc Prof Bernard Chern Su Min (far right) receiving the cheque from Ms Grace Fu, Minister for Culture, Community and Youth

6 November 2015 – 3rd SingHealth Duke-NUS OBGYN ACP Research Day

The SingHealth Duke-NUS Research Day is a dedicated platform for sharing the research achievements of OBGYN residents in the field of Obstetrics and Gynaecology. The highlights of the event included an encouraging talk by Assoc Prof Tan Say Beng on supporting research in SingHealth ACPs, an inspiring talk by Dr Sng Ban Leong on his journey becoming a Clinician-Scientist, and enlightening talks by Prof Tan Kok Hian on “A Novel Differential Isolation Technology for Preeclampsia Biomarker Discovery in Extracellular Vesicles” and Dr Juan Diez on “Human Pancreatic Islet of Langerhans Organogenesis: Acquiring the Right Cytoarchitecture”.

The event was well attended by faculty, residents and trainees. A total of 52 scientific posters were submitted. It ended with presentation of three Oral Presentation awards, an Outstanding Young Investigator Award as well as five Pitch for Grant Awards to our OBGYN Residents.

Award Category	Study Title
Best Oral Presentation Award Awardee: Dr Shayna Siew Mentor: Assoc Prof Tan Thiam Chye	Randomised Controlled Trial of Micronised Progesterone versus Dydrogesterone for Threatened Miscarriage
Merit Award Oral Presentation Award Awardee: Dr Muhammad Fairuz B Abdul Rahman Mentor: Prof Tan Kok Hian	Single Versus Combination Tocolytic Regimen In The Prevention of Preterm Births In Women: A Prospective Cohort Study
Best Poster Award Awardee: Dr Petty Chen Mentor: Prof Tan Kok Hian	Incremental Cost-effectiveness Analysis of Gestational Diabetes Mellitus Screening Strategies in Singapore
Outstanding Young Investigator Award Awardee: Dr Ng Qiu Ju Mentor: Prof Tan Kok Hian	Placental growth factor (PlGF) and soluble fms-like tyrosine kinase-1 (sFlt-1) in Pregnant Asian Population
Pitch for Grant Award (2015) Awardee: Dr Grace Ng Mentor: Prof George Yeo Seow Heong	Cervical Ripening Balloon in Induction of labour at Term – a prospective randomised controlled cohort study
Pitch for Grant Award (2015) Awardee: Dr Lim Hui Ping Michelle Mentor: Assoc Prof Tan Thiam Chye	Comparison of Methods of Venous Thromboprophylaxis in patients undergoing Elective Caesarean Sections – a randomized controlled trial
Pitch for Grant Award (2015) Awardee: Dr Lim Whui Whui Mentor: Prof George Yeo Seow Heong	Intrauterine Reduction in Growth Velocity as a Predictor of Poor Perinatal Outcome in Appropriately Sized Fetuses at Term
Pitch for Grant Award (2015) Awardees: Dr Qi Maili and Dr Ho Ping Ling Mentor: Dr Lim Yong Kuei Timothy	HPV genotyping in women with low grade cervical cytological abnormalities

28 November 2015 – SingHealth Residency Games Day

The annual SingHealth Residency Games was held on the 28th of November 2015 at Zoom Park. This year, the OBGYN Residency sent out 2 teams of residents, Dora the Explora and Wizard of Os (Dr Fairuz, Dr Ho Ping Ling, Dr Ho Xin Yi, Dr Joella Ang, Dr Jonathan Han, Dr Lim Whui Whui, Dr Lim Yu Hui, Dr Liu Jiayi, Dr Michelle Loh, Dr Ng Qiu Ju, Dr Poo Zi Xi, Dr Stella Sasha, and Dr Yip Swee Lin). The games were held in an indoor trampoline park, where our teams were up against a total of 17 programmes and 3 medical school.

OBGYN faculty Dr Chew Ghee Kheng and Dr Pamela Tan came down to show their support for the residents. It was a close fight with the Ophthalmology and Orthopedic Surgery programmes, but our OBGYN residents emerged as the CHAMPIONS!

The OBGYN Residency Teams (Dora the Explora and Wizard of Os) clinched the top prize at the SingHealth Residency Games Day

8 January 2016 - 3rd SingHealth Duke-NUS OBGYN ACP Education Day

The aim of the SingHealth Duke-NUS Education Day is to allow our clinician educators to cross-share of various OBGYN education projects and initiatives. At the same time, clinicians can look forward to sharing of educational topics from our guest speakers. We were honoured to have Assoc Prof Ian Yeo Yew San, Academic Vice Chair of Education for SingHealth Duke-NUS Ophthalmology and Visual Sciences ACP who shared with us on Practical Teaching Models for Residency Faculty. Prof Hwang Nian Chih, Senior Consultant and Head for Department of Cardiothoracic Anaesthesia in National Heart Centre, along with Dr Natascha Fherzinah Ghadiali, Senior Consultant from Department of Anaesthesiology and Mr Edison Ng, Manager for Learning Technologies, further enhanced the day's programme by delivering an intriguing co-presentation on "Best Practices on VAP Production". There were interesting educational projects shared by our OBGYN doctors and residents. They included "Lee Kong Chian School of Medicine (LKC SoM)- Updates from Trip to Imperial College – London" by Dr Kathirvel Rajeswari, "Using Digital Media As An Intervention Tool In Modifying The Learning Approaches of Medical Students" by Dr Sonali Chonkar, "International Outreach to Tamil Nadu, India" by OBGYN resident Dr Muhammad Fairuz B Abdul Rahman, and "Candidate Pilot Selection for Competence Assessment of Residency Candidate Interview" by OBGYN Senior Resident Dr Ho Weng Yan.

The event ended with Assoc Prof Bernard Chern presenting the OBGYN Education Awards to our OBGYN doctors and residents. The following awards were presented:

OBGYN ACP Education Awards	AWARDEES
Best Advanced Specialist Trainee Award (KKH) (July 2014 to June 2015)	Dr Wang Junjie
Best Advanced Specialist Trainee Award (SGH) (July 2014 to June 2015)	Dr Tan Wei Keat Andy
Best R4 Resident Award (July 2014 to June 2015)	Dr Ho Weng Yan
Best R3 Resident Award (July 2014 to June 2015)	Dr Lim Yu Hui
Best R2 Resident Award (July 2014 to June 2015)	Dr Ang Xiao Hong Joella
Best R1 Resident Award (July 2014 to June 2015)	Dr Lim Whui Whui
Best CREOG Score (July 2014 to June 2015)	Dr Thain Pei Ting Serene

AWARDS AND ACHIEVEMENTS:

15 January 2015 – Inaugural SingHealth Doctors and Dentists Long Service Award 2015

Over 100 doctors were honoured at the inaugural SingHealth Doctors and Dentists Long Service Award held at St. Regis Hotel on 15 January 2015 for their passion and dedication to patient care for over 10 years. Among them, 36 doctors and dentists received long recognition for serving in public healthcare for up to 20, 30 and even 40 years.

At the occasion, a special tribute was paid to healthcare pioneers, Assoc Prof Philip Yam Kwai Lam, Senior Consultant, Department of Gynaecological Oncology and Prof Yeo Seow Heong George, Senior Consultant, Department of Maternal Fetal Medicine to thank them for their unshakable commitment and dedication and a relentless pursuit towards delivering medical excellence. Assoc Prof Philip Yam Kwai Lam, Dr Shephali Tagore, Dr Suzanna Binte Sulaiman and Dr Tan Kai Lit received the Long Service Award in recognition of their commitment towards healthcare.

3 September 2015 – British Medical Association (BMA) Medical Book Award

The prestigious British Medical Association (BMA) takes place annually in London to recognize outstanding contributions to medical literature. All entries undergo a rigorous appraisal by doctors and educators who are interested in medical publishing.

The ‘**Practical Obstetrics and Gynaecology Handbook: for O&G Clinicians and General Practitioners 2nd Ed 2014**’ produced by KKH clinicians Assoc Prof Tan Thiam Chye , Dr Tan Kim Teng, and Dr Sonali Chonkar amongst the authors took home the highly commendable award at the BMA Book Awards in 2015. Only the top 4 in OBGYN Category were awarded Book Award amongst 630 competing books. The preparations for the first edition of this publication began in 2006. The preparation works for the award winning second edition began in 2011 and was published in March 2014.

The book received outstanding reviews from BMA: **“This is a useful reference book and a fantastic educational resource. Multiple papers and NICE guidelines have been condensed and summarised into a readable format with beautiful illustrations, photos and diagrams. I will recommend this book to local GP trainees. Clear Photos. Useful diagrams and a good combination of medical and practical advice.”**

Facing stiff competition against reputable universities like Oxford and Cambridge, the award showcases our OBGYN doctors’ continuous dedication towards shaping the healthcare landscape and is a great achievement for the SingHealth Duke-NUS OBGYN ACP Academic Medicine journey.

25 – 26 September 2015 – AM•EI Education Leadership Programme : AMLead

The AM•EI Education Leadership (AMLead) Programme is a fellowship that brings together an interprofessional community of healthcare educators to develop their education leadership skills. For nine months, the educational leaders met together to engage in cross-learning of leadership experiences and expertise as well as receive leadership assessments, enabling them to be effective and efficient in their roles as they lead new integrated educational initiatives. In culmination of all their hard work over these nine months, they presented to an audience of more than 100 educators at the 2nd SingHealth Duke-NUS Education Conference (Leadership Track II) their vision for Education in SingHealth.

Prof Ho Tew Hong, Vice Chair for Education, SingHealth Duke-NUS OBGYN Academic Clinical Programme, shared an intriguing presentation on “Centre of Excellence – An Expression of Our Project Work”. He elaborated on the experience of the OBGYN ACP in bringing the PROMPT model, a multiprofessional obstetrics emergencies training package into SingHealth, along with how OBGYN ACP integrate the model into the current medical education curriculum in place.

Prof Ho Tew Hong, Vice Chair for Education, SingHealth Duke-NUS OBGYN ACP, sharing an intriguing presentation on Centre of Excellence – An Expression of our Project Work

Prof Ho Tew Hong receiving the AM•EI Education Leadership Programme: AMLead certificate from Prof Ivy Ng, Group CEO, SingHealth

20 November 2015 – Prize Medal (Gold) for MRCOG Examinations

Dr Thain Pei Ting Serene, Senior Resident, Division of Obstetrics and Gynaecology, was conferred the overall Prize Medal (Gold) for the Membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) examination. This prestigious award is awarded only to the best candidate worldwide. Attaining the best results amongst the numerous candidates who sat for the MRCOG Examinations worldwide, Dr Serene Thain has placed Singapore as well as SingHealth Duke-NUS OBGYN Residency Programme on the world map once again, after the last award 28 years ago. Her achievement is testament to SingHealth Duke-NUS Academic Medicine excellence in Obstetrics and Gynaecology.

Senior Resident Dr Serene Thain Pei Ting receiving her certificate

MRCOG Gold Prize Medal

20 November 2015 – National Day Award

The National Day Awards are a means of recognizing various forms of merit and service to Singapore. In honour of more than 25 years of dedicated service and commitment to the public healthcare, the Republic of Singapore has gratefully acknowledged the valuable contributions of Assoc Prof Tan Hak Koon to the nation with the Long Service Award (Pingat Bakti Setia).

Long Service Medal, Assoc Prof Tan Hak Koon, Academic Deputy Chair, Senior Consultant and Head, Department of O&G, Singapore General Hospital

CLINICAL CARE

Routine Gestational Diabetes Mellitus Screening

From 1 January 2016, KKH and SGH launched a six-month pilot offering Gestational Diabetes Mellitus (GDM) screening to all pregnant patients at 24 to 28 weeks gestation. The trial is based on a local study spearheaded by Prof Tan Kok Hian, Principal Investigator, Head and Senior Consultant, Perinatal Audit and Epidemiology Unit, Division of O&G, KKH and researchers from both KKH and Duke-NUS Medical School, which found that extending GDM Screening to all pregnant women has a better detection rate compared to targeted screening or no screening as it offers wider coverage of timely interventions. Proper medical management for patients with GDM is cost effective as it allows complication rates to be reduced by as much as 40 percent, giving both mother and baby a better long-term prognosis. This pilot will aid in streamlining the practice for the local population, and gain further information to enhance GDM management practices in Singapore and other countries.

Both hospitals have adopted the International Association of Diabetes and Pregnancy Study (IADPSG) criteria, which are based on data from the international HAPO (Hyperglycemia and Adverse Pregnancy Outcome). The new criteria facilitate higher sensitivity and specificity of diagnosis of GDM.

Professor Tan Kok Hian said screening is the most effective way to avoid under-diagnosing gestational diabetes mellitus, and to detect and manage it early. Pregnant women are screen with an oral glucose tolerance test using a flavoured sweet drink as shown here.

TrustedCare™ Elective LSCS

TrustedCare is a new model of care for pregnancy which seeks to ensure consistent quality care for women choosing to undergo elective caesarean section. Led by Prof Kenneth Kwek Yung Chiang, Prof Yeo Seow Heong George and Dr Shephali Tagore, a multidisciplinary taskforce was formed to redesign the entire process of elective caesarean section to integrate evidence-based practices into a standardized elective caesarean section care pathway.

From listing for surgery to discharging, patients were tracked electronically with their records harmonized within a single platform from various disparate systems. This minimized paperwork and provided a centralized view of all patients undergoing elective caesarean section. The improved clinical documentation enabled clinicians and healthcare staff easier access to patients' records and encouraged greater co-ordination between multidisciplinary teams. The digitization of patient's medical records also allowed clinicians to make better decisions by assessing the effectiveness of clinical practices and interventions through monitoring of clinical outcomes and identification of trends.

Beyond optimizing clinical outcomes, enhancing patient safety and operational efficiency, TrustedCare represents a milestone of our continuous efforts towards financial sustainability for our patients.

09 July 2015 - The Launch of the IVF Web-Application

SingHealth IVF App, the first-of-its-kind in-vitro fertilization (IVF) App in Singapore, was launched on 9 July 2015 at the SingHealth Duke-NUS OBGYN ACP townhall. The patient centric application provides general information, FAQ, financial information and hospital contacts on IVF to patients or couples considering IVF as an option for conception. The application has also in-built IVF appointment calendar to keep patients organised for their IVF visits.

A joint team from SingHealth Duke-NUS OBGYN ACP and KKH Integrated Health Information Systems (IHIS) designed and developed the application. The team was led by Adj Assoc Prof Yu Su Ling, Senior Consultant, Department of Obstetrics and Gynaecology, SGH and Adj Assoc Prof Tan Heng Hao, Head of Department of Reproductive Medicine, KKH.

Singapore's First Mobile Application on In-vitro Fertilization (IVF)

Mor Jack NG¹, Wei Teng CHEN¹, Limin KAM¹, Christine LOH Poh Leng¹, Diana CHIA Siew Fui¹, Choon Koat LEE², Heng Hao TAN¹, Su Ling YU¹, Hak Soon TAN¹, Bernard CHEN Su Min¹, Kok Han TAN¹

¹ SingHealth Duke-NUS OBGYN Academic Clinical Programme, ² Integrated Health Information Systems, KKH

AIM:

The aim is to assess patient and public's need for an IVF App. The secondary aim is to develop a patient centric App that caters to the needs of patient and public through a pre-development survey.

METHODOLOGY:

A pre-development survey was conducted at KKH & SGH IVF clinic. 82 (80.3%) of the respondents strongly agreed that it will be helpful to have a mobile application on IVF. Majority of the 50 (59.3%) of the respondents are unaware of any such App on the market.

The survey further revealed that respondents would like to suggest following features to be included in the development: Calendars/Reminders, Education Materials, Financial information and hospital appointment hotline related information.

RESULTS

The team has reviewed and incorporated the suggestions.

The IVF App developed includes the following features:

- My IVF Schedule: Simple interactive inputs to remind patients of key events/milestones during their IVF cycle in calendar & reminder format.
- IVF Education: General Information on in-vitro fertilization to patients and couples considering IVF.
- FAQ: Frequently asked questions on IVF including treatments and financial information

- IVF Calculator: Calculating your gestation age of embryo based on your ovulation date.
- Contact Us: Operation hours and telephone numbers for IVF consultation and enquiries at KK Women's and Children's Hospital and Singapore General Hospital.

Jointly designed and developed by SingHealth Duke-NUS Obstetrics & Gynaecology Academic Clinical Programme (OBSGYN ACP) and KKH Integrated Health Information Systems (IHIS) team, the App is both available on Android and iOS platform.

CONCLUSION

SingHealth IVF App is first of its kind in-vitro fertilization (IVF) App in Singapore. It will be available free for download. We have planned a post-launch survey to gather the feedbacks for further improvement.

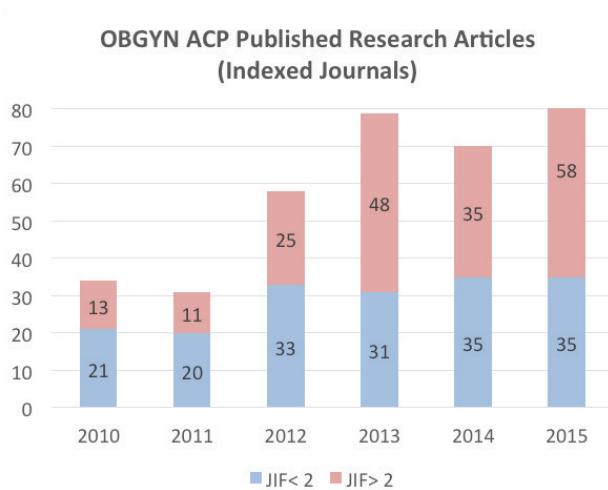

24 July 2015 – The Launch of the Fetal Surgery Suite

KKH has opened Singapore's first Fetal Surgery Suite, dedicated to providing complex fetal treatments. A one-stop facility for fetal surgeries, the suite offers a comprehensive range of key procedures. Among the procedures offered at the Fetal Surgery Suite is fetal laser surgery for the treatment of Twin to Twin Transfusion Syndrome (TTTS) – a rare syndrome, which only occurs in identical twins that share the same placenta. KKH manages about four to five cases of TTTS a year. Without treatment, pregnancies with TTTS have less than 10% survival for both the twins, but timely intervention can significantly improve their chance of survival to 75%-80%. Now such conditions and complications affecting babies in the womb can be treated in a new dedicated facility with advanced capabilities and expertise – the Fetal Surgery Suite at KKH.

RESEARCH

Research KPIs (Indexed Publications)

Research Highlights:

Intrauterine Reduction in Growth Velocity as a Predictor of Poor Perinatal Outcome in Appropriately Sized Fetuses at Term

Current research on intrauterine growth restriction (IUGR) has focused on the poorer outcome of fetuses with an estimated fetal weight (EFW) of less than 10% and abnormal Doppler measurements. However, there are still babies born with normal birth weights with unexplained poor postnatal outcome. It is postulated that fetuses, who start the 2nd trimester on a normal EFW but reach the 3rd trimester on a lower than expected EFW and with a birth weight that is within normal range, represent a group of IUGR fetuses that could potentially remain undetected but are at risk of poor perinatal outcome.

The study aims to identify term and appropriately-sized fetuses with an intrauterine reduction in growth velocity and correlate them to their perinatal outcome. Singleton fetuses with an EFW of more than 25% at the 2nd trimester and a reduction in the EFW of more than 15% between

the 2nd and 3rd trimester will be recruited. Pregnancies will be dated by first trimester crown-rump length measurements. The EFW will be calculated using the Hadlock formula. Only cases of cephalic presentation without contraindications for a vaginal delivery will be considered. Umbilical, uterine and middle cerebral arteries blood flow Doppler will be evaluated. Maternal angiogenic factors, such as PlGF and sFlt-1 will be measured. The placenta will be examined histopathologically for evidence of placental under-perfusion. Perinatal outcome data (emergency delivery for non-reassuring fetal status and neonatal metabolic acidosis) will be recorded.

The principal investigator, Dr Tan Kai Lit, Consultant, Department of Maternal Fetal Medicine, received an award from the Clinician Scientist - Individual Research Grant - New Investigator Grant (CS-IRG-NIG) to support the research for 2 years.

Diagnostic Kit for Prediction of Spontaneous Miscarriage and other Adverse Pregnancy Outcomes

Spontaneous miscarriage, preterm delivery and pre-eclampsia represent a spectrum of obstetric complications that causes both maternal and neonatal morbidity and mortality. In the last decade, the emphasis of screening for adverse pregnancy outcomes has shifted to the first trimester. However, there is still currently no accurate first trimester screening test used clinically to predict the occurrence of these adverse pregnancy outcomes.

The goal of this project is to improve both diagnosis and management of adverse pregnancy outcomes in women presenting with threatened miscarriage. The advantages of a good screening test for women with threatened miscarriage are two-fold; to prognosticate outcome and guide therapeutic interventions for these women throughout pregnancy, and to provide anticipatory guidance and mobilize resources to cater to their psychological wellbeing. The results of this study will provide insights into the pivotal role of progesterone and PIBF (Progesterone-Induced Blocking Factor) in maintaining a healthy and successful pregnancy, and facilitate development of a screening test for early identification of threatened miscarriage and other adverse

pregnancy outcomes. In addition, the development of a urine test for predicting adverse pregnancy outcomes represents a novel and convenient method that is likely to achieve widespread clinical application.

SingHealth OBGYN ACP Faculty, Assoc Prof Tan Thiam Chye, Senior Consultant, was awarded the National Medical Research Council - Ministry of Health Industry Alignment Fund Category 1 (NMRC MOHIAFCAT1) grant for his grant proposal titled "Diagnostic Kit for Prediction of Spontaneous Miscarriage and other Adverse Pregnancy Outcomes" with total funding quantum of \$924,000. The award aims to support researchers in their pre-clinical and clinical research projects carried out in collaboration with the industry. This is to encourage commercially relevant research, fostering new directions in translational biomedical research and multi-disciplinary and multi-institutional collaborations that will bring new perspectives to the field.

Singapore Preconception Study of Long-term Maternal and Child Outcomes (S-PRESTO)

The Singapore PREconception Study of long-Term maternal and child Outcomes (S-PRESTO) study has a globally unique design of recruiting before pregnancy and undertaking extensive nutritional, metabolic and neuroendophenotyping before pregnancy and in the first trimester. The core hypothesis of the study is that maternal state before and soon after conception has a major effect on offspring epigenotype and outcomes. The establishment of S-PRESTO cohort, Singapore's first large-scale preconception study, would allow the testing of hypotheses related to the relationship between pre- and periconceptual influences with later offspring health. Subject recruitment for S-PRESTO study started in February 2015 and the data and sample collection have been going smoothly.

The co-investigators and collaborators in S-PRESTO Study are Assoc Prof Jerry Chan Kok Yen, Prof Kenneth Kwek Yung Chiang, Adj Assoc Prof Bernard Chern Su Min, Adj Assoc Prof Tan Heng Hao, Prof Yeo Seow Heong George, Prof Tan Kok Hian and Adj Asst Prof Ang Seng Bin. Through the continuous partnership of the research team and study participants, S-PRESTO will play a major role in translating scientific evidence into clinical practice and policy and into private sector translation. These findings will be important in instituting prevention and intervention strategies targeting healthy childhood development, and reducing the risks of metabolic and mental diseases, which

ultimately aid in enhancing health outcomes for every birth.

Gestational Diabetes Mellitus Screening Strategies in Singapore

With the worldwide obesity epidemic affecting Singapore, the prevalence of gestational diabetes mellitus (GDM) has steadily increased. GDM is associated with higher rates of both maternal and fetal morbidity. These risks highlight the importance of properly screening and treating women at risk for GDM. Medical interventions for GDM patients reduce complication rates by as much as 60%. This study aims to evaluate the incremental cost effectiveness of the three GDM screening strategies: no screening, targeted screening, and universal screening.

The results gathered from the study favoured routine screening as the most optimal screening strategy in Singapore where GDM rates are high, and treatments are very effective to achieve desirable outcome. By detecting GDM early, patients can get timely interventions that reduce complications during and after pregnancy. This study led to the eventual roll out on pilot 6-month routine Oral Glucose Tolerance Test (OGTT) for all pregnant patients in KK Women's and Children's Hospital (KKH) and Singapore General Hospital (SGH).

Dr Petty Chen, SingHealth Postgraduate Year One Resident, conducted the study as part of her third and final-year student research project in Duke-NUS Medical School (a collaboration between Duke University, Durham and National University of Singapore) under the mentorship of Prof Tan Kok Hian and Prof Eric Finkelstein. The study was presented at the 3rd SingHealth Duke-NUS OBGYN ACP Research Day and it was awarded the Best Poster Award at the event.

EDUCATION

3 - 5 May 2015 - 11th International Society of Ultrasound in Obstetrics & Gynaecology (ISUOG) 2015: Defining Contemporary Office Investigations - Closing the gap between ultrasound, laboratory tests, and your practice

The 11th ISUOG Outreach Course, in conjunction with the 6th Scientific Congress of the College of Obstetricians & Gynaecologists, Singapore was organized by the ISUOG Teaching and Training Centre, Singapore and chaired by Prof Yeo Seow Heong George. This event was organized as a regional O&G Ultrasound education, with an aim to raise the awareness of ISUOG activities in Singapore and the region countries.

The theme of the event was **“Defining Contemporary Office Investigations - Closing the gap between Ultrasound, Laboratory Tests, and Your Practice”**. Overall, the sessions covered many aspects of obstetrics ultrasound and provided a comprehensive programme with a wide range of O&G topics. Sub-specialties were included on Day One of the programme, which was enriching and informative.

The faculty team included many world-renowned speakers from Australia, France, Germany, Hong Kong, Israel, Japan, Korea, Malaysia, Taiwan, United Kingdom and United States of America.

The past decade witnessed an explosion of science and medical knowledge surrounding the Obstetrics and Gynaecology practice. Many routine tests have gone molecular; point of service imaging has become very sophisticated; reports of tests utilising sophisticated bioinformatics algorithms land on our clinic desk daily.

The academically stimulating course aimed to update regional clinicians on the tests and practices best suited for their clinical needs. At the same time, the meeting served as a dynamic forum for internationally renowned experts on ultrasound and healthcare practitioners to share with each other their clinical experiences and give their expert views on issues and challenges commonly encountered in the daily practice.

Dr Serene Thain received the Best Poster Presentation on “Fetoscopic Laser Photocoagulation in Twin-Twin Transfusion Syndrome – Experience from a Single Institution” from Prof Gustavo Malinger

Prof Rabih Chaoui, one of the speakers of the “Train the Trainer” Session

Participants learning from the experts at the “Train the Trainer” Session

13 - 15 May 2015 - International Society of Obstetric Medicine Regional Course (ISOM) & 6th Maternal Medicine Course

The International Society of Obstetric Medicine Regional Course (ISOM) and 6th Maternal Medicine Course aimed to train both obstetricians and physicians in mastering the essentials of common and important medical problems in pregnancy, keeping current with controversies in management of diabetes in pregnancy and understanding common misconceptions with radiology and imaging for the pregnant women. The course was chaired by Adj Assoc Prof Tan Lay Kok.

Assoc Prof Kenneth Chen and Prof Raymond Powrie, who are professors of medicine at the Warren Alpert Medical School of Brown University, joined Prof Sandra Lowe of Australia and Prof Catherine Nelson-Piercy of the United Kingdom as invited overseas faculty to share their knowledge and experience related to maternal medicine during the plenary lectures at the course. There was a panel discussion of challenging real-life obstetrics medicine cases with interactive participation from the audience. A number of delegates proceeded to sit the RCOG (Royal College of Obstetricians and Gynaecologists) Membership Examination, which was held shortly after the completion of the course and the feedback was that this course prepared them very well for the examination.

Group photo taken with the invited guest speakers and participants

3 - 6 June 2015 - Asia Pacific Association for Gynecologic Endoscopy and Minimally Invasive Therapy (APAGE) Regional Congress 2015 - Endometriosis & Gynecological Cancer- Strategies in Minimally Invasive Surgery

The event was jointly organized by the Minimally Invasive Surgery (MIS) unit of KKH in conjunction with OBGYN Academic Clinical Programme and Asia Pacific Association for Gynecological Endoscopy and Minimally Invasive Therapy (APAGE) and chaired by Assoc Prof Bernard Chern Su Min. The faculty team comprised of around 40 renowned laparoscopic surgeons from Singapore and abroad such as Switzerland, Australia, Japan, Taiwan and other regional countries.

Building on the central theme of "Endometriosis & Gynecological Cancer- Strategies in Minimally Invasive Surgery", the congress served as an international scientific platform to shed light on the questions and controversies regarding the treatment approaches and use of minimally invasive techniques in the management of endometriosis and gynaecological malignancies via laparoscopy. It was marked with immense and constructive professional and academic developments as well as an opportunity to meet the expert laparoscopic surgeons from across the globe, to share their views and experiences and learn from them.

Aspects on techniques in laparoscopic surgery for management of deep endometriosis and management of endometriosis of bowel and urological tract, feasibility and techniques of minimally invasive surgery in the management of various gynaecological cancers were covered during the event. The highlights of the congress were the dry lab and animal-model hands-on training. Both local and overseas trainees had opportunities for hands-on practice to further enhance their surgical skills under close supervision and guidance from experienced gynaecologic laparoscopists, colorectal surgeons and urologists who are well versed in laparoscopic gynaecological, colorectal and urological surgeries. Participants were also taught various exercises including laparoscopic suturing, cystectomy, experienced the use of different energy sources and new endoscopic devices and underwent laparoscopic simulator training.

22 September 2015 - Pre-conference workshop of 2nd SingHealth Duke-NUS Education Conference (OBStetrics Team TRaining In Core Skills Workshop)

The OBSTETRICS (OBStetrics TEam TRaining In Core Skills) Workshop is an evidence-based multi-professional training based on the successful PRactical Obstetric Multi-Professional Training (PROMPT) conducted in the United Kingdom. The pre-congress workshop was co-led by Dr Shephali Tagore and Dr Tan Eng Loy who are certified PROMPT trainers and play a pivotal role in nurturing generations of obstetricians. They have been running the course since 2014 and have since trained approximately 200 trainees till date.

The course covered the management of a range of obstetrics emergency situations. Participants were taken through a step-wise systematic clinical approach providing them with the opportunity to integrate various skills taught during didactic teachings whilst going through the simulated obstetrics emergency skill stations. It aimed at improving awareness of obstetrics emergencies and reducing preventable harm to mothers and their babies. Many expressed that they have benefitted from the workshop and are more confident in handling the obstetrics emergencies.

Dr Kathirvel Rajeswari, (second from bottom left) with the Imperial College Faculty and delegates from LKC Medicine

Lee Kong Chian (LKC) Medicine Trip to Imperial College School of Medicine, London – Dr Kathirvel Rajeswari

Dr Kathirvel Rajeswari, our OBGYN ACP Deputy Lead for Lee Kong Chian School of Medicine (a collaboration between Nanyang Technological University and Imperial College London), went on a trip to Imperial College School of Medicine, London from 16 - 20 November 2015 together with other Year 4 LKC Medicine Leads to meet the London Faculty. The objectives of the trip were to discuss the learning objectives, assessments and outline of rotations for the upcoming academic year to prepare for the first intake of LKC Medicine Year 4 students.

International Outreach to Tamil Nadu / Education Development – Dr Muhammad Fairuz B Abdul Rahman

In collaboration with the Singapore International Foundation (SIF), our O&G doctors Prof Kenneth Kwek Yung Chiang, Dr Shephali Tagore, Dr Sonali Chonkar, Dr Shilla Mariah and residents Dr Muhammad Fairuz B Abdul Rahman and Dr Carmen Tong embarked on a mission trip to Trichy, Tamil Nadu from 26 - 31 July 2015. The group consisted of a multi-disciplinary team of KKH doctors, nurses, O&G medical students and administrators. Over 4 days, the multi-disciplinary team conducted training emphasizing on early recognition, timely response, effective management of common obstetrics emergencies, and importance of other aspects such as preparedness, teamwork and communication. Master trainers were selected at the end of the programme for future courses and training.

One of the goals of the trip was to reduce maternal and infant mortality rates by better identification and management of high risk pregnancies and obstetric emergencies in Tamil Nadu. Through this initiative, they aim to have at least 50,000 pregnant mothers to benefit from the programme over 4 years.

Group photo comprising of multi-disciplinary team of KKH O&G doctors, nurses, medical students and administrators

Conducting hands-on and simulation sessions

Striving towards Improving Maternal Morbidity and Mortality in Kampong Chhnang Province, Cambodia: A Social Capital Venture Development (SCVD) Initiative Collaborated by KK Women's & Children's Hospital (Medical Mission Trip 2013- 2015)

KK Women's and Children's hospital in partnership with Social Capital Venture Development (SCVD) and Kampong Chhnang Provincial Health Department (PHD) have completed three, one week training courses in Kampong Chhnang from 2013 to 2015. The initiative led by O&G doctors, Prof Kenneth Kwek Yung Chiang, Dr Shephali Tagore, Dr Manisha Mathur and Dr Sharon Foo Anqi was spearheaded in 2013, following one year of research and preparation to provide tailored low cost medical solutions and bring obstetrics emergencies training to over 200 midwives at all 39 health centres and 3 hospitals in the province. Promising participants were selected as Master Trainers for continuity of the training programme. The training does not end there, as refresher training is conducted regularly to maintain the proficiency level of the health care practitioners.

By the third year, a total of 192 midwives were trained, KKH trained 115 midwives and the Master Trainers trained 77 midwives. The impact of the outreach obstetric emergencies training has dropped the mortality rate for mothers during birth by 70% in Kampong Chhnang.

Faculty Team comprising of multi-disciplinary team of KKH O&G doctors, nurses and administrators

Hands-on training allowing the participants to gain more practical experience

Candidate Pilot Selection for Competence Assessment of Residency Candidate Interview – Dr Ho Weng Yan

Senior Resident, Dr Ho Weng Yan, embarked on a project to introduce a surgical skills assessment on sensorimotor skills and personality traits station in the interview process for SingHealth OBGYN residency programme. The objective was to test the feasibility of a validated computer-based aviation assessment instrument as an appropriate tool to assess potential OBGYN trainees. Respondents participate in a 2 hour individual computer-based session where they individually complete: 17 item paper-based survey, Sensomotorical Computerized Pilot Aptitude and Screening System (COMPASS) based on 6 skills (1-7 scale), Checklist Professional Profile CPP (225 binary questionnaire) and 15 personality traits (1-9 scale).

Senior Resident Dr Eugene Huang assessing a candidate at the laparoscopic station

Public Forums

Dr Lim Yong Kuei Timothy presented on the Gynaecological Oncology public forum

Dr Alexandria See Tze Ann presented on the Minimally Invasive Surgery public forum

Both KKH and SGH have actively organised public forums to enhance public awareness and knowledge of pertinent O&G issues. The forums have received overwhelming support from the public.

11 April 2015 – Public Forum titled "Guide to Common Women's Health Concerns and a Healthier You" by Department of Minimally Invasive Surgery, KKH

21 June 2015 – Public Forum titled "Cervical Cancer – Prevention is Better than Cure" by Department of Gynaecological Oncology, KKH

22 August 2015 – Public Forum titled "Your Fertility Journey: Planning Ahead" by Department of Reproductive Medicine, KKH

V) Junior Residency, Year 1 (2015 Intake)

S/N	NAME
1	Dr Stella Rizalina Sasha
2	Dr Han You Xiang Jonathan
3	Dr Kwek Lee Koon
4	Dr Liu Jiayi
5	Dr Pamela Sandriany Partana
6	Dr Poo Zi Xi
7	Dr Ng Yifan
8	Dr Pang Si Ying

OUR PIONEER MEDICAL RESEARCH & ADVANCES

- 1 Pioneered in-vitro fertilisation (IVF) research in Asia, producing the region's first IVF baby and first Gamete Intra-Fallopian Transfer (GIFT) baby.
- 2 Performed Singapore's first IVF treatment and live birth for a patient with ovarian cancer
- 3 Invented a new procedure to create an artificial vagina for women born without a vagina (Sheares Operation).
- 4 Conducted Asia's only human papilloma virus (HPV) vaccine trial FUTURE II Study – a worldwide trial on a vaccine that is now widely used to protect women against cervical cancer.
- 5 Partnered the global MAGPIE trial, establishing Magnesium Sulphate as the gold standard of care for treatment of hypertension in pregnancy (pre-eclampsia).

HOW YOUR GIFT CAN CHANGE MEDICAL SCIENCE

When you give to the OBGYN Academic Clinical Program, your gift helps to develop better methods to predict, prevent and treat disease, and prepare the next generation to lead in research that improves medical care.

Professor Tan Kok Hian and his team discovered potential new biological markers that can identify women at risk of pre-eclampsia (high blood pressure) during pregnancy. This helps doctors to provide early intervention for the safety of the mother and baby.

MAKING A GIFT

Contribution form

My gift is in support of the OBGYN Academic Clinical Program (ACP) for Research & Education Programmes.

Name of Donor: _____

Address: _____

Date of birth: _____ Contact number: _____

Email: _____

HELP US **CHANGE** WOMEN'S LIVES

Research helps us change the lives of women and give them and their babies a healthy future. You can help to:

- Translate medical breakthroughs into cures
- Fund programmes to improve care
- Shape the next generation of leaders in healthcare

Obstetrics & Gynaecology (or OBGYN, O&G) relates to the care of women in pregnancy and delivery (obstetrics) and the care of women's diseases (gynaecology).
