

# FOREWORD

**Prof Thomas Coffman**  
Dean,  
Duke-NUS Medical School

**Prof Ivy Ng**  
Group Chief Executive Officer,  
SingHealth

Patient safety is paramount in healthcare. At the SingHealth Duke-NUS Academic Medical Centre, we are committed to prioritising patient safety while advancing clinical care and building a pipeline of healthcare professionals.

The SingHealth Duke-NUS Institute for Patient Safety & Quality is excited to offer three graduate programmes:

## **Duke-NUS Medical School**

### **Graduate Certificate in Patient Safety & Healthcare Quality (GC-PSHQ)**

- Learn and gain a good understanding of key principles in building a reliable and safe healthcare system

## **National University of Singapore (NUS)**

### **Graduate Diploma in Patient Safety & Healthcare Quality (GD-PSHQ)**

- Integrate key principles into real life scenarios through a capstone project and hone skills in relevant areas via a range of elective courses

## **National University of Singapore (NUS)**

### **Master's in Patient Safety & Healthcare Quality (MPSHQ)**

- Master the skills needed to develop an effective framework to drive policies, strategies and initiatives in building reliable and safe healthcare systems nationally, regionally and globally

These programmes are designed to equip you with applicable knowledge and practical strategies to champion and drive patient safety in your organisation. You will also have opportunities to interact and learn from experienced senior healthcare leaders and forerunners in patient safety and quality from the region and beyond.

We warmly welcome your participation and hope you will benefit greatly from our programmes.
