The Future of Healthcare Technology is NOW...

<https://www.youtube.com/watch?v=d5QRRBsrWeQ>

THE FUTURE IS NOW

AND BIOMETRIC TECHNOLOGY IS COMING TO LIFE.

NEC Multi-modal Biometrics ID device (Face and Iris)

Tokyo, May 14, 2020 - NEC Corporation (NEC; TSE: 6701) today announced the development of a multimodal biometric authentication terminal incorporating face and iris recognition technologies that have been recognized as the world's No.1 (*1) in benchmark tests for identification technologies conducted by the U.S. National Institute of Standards and Technology (NIST), and are core technologies of NEC's multimodal biometric authentication brand, "Bio-IDiom"(*2).

This reinforces NEC's ability to provide high levels of authentication accuracy and convenience for users throughout a wide range of environments.

Successfully recognizes individuals wearing face masks

The application of multimodal biometric identification technology utilizing face and iris information enables touchless identification of individuals to be achieved, even when gloves and face masks are worn or when both hands are occupied with baggage.

In Development: Contactless Border Control/Hospitals + Contact Tracing for the NEXT Normal

Integrating Safety and Security

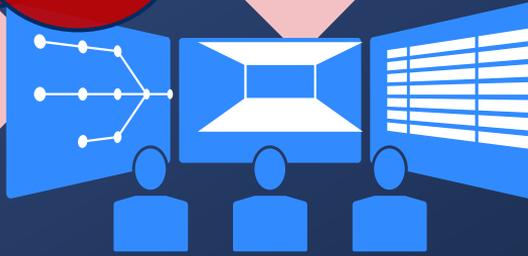

Immigration/Security Clearance and Disease Control

Contact Tracing

NEC publishes design blueprints for SARS-CoV-2 vaccines using its Artificial Intelligence technology

- NEC has used *artificial intelligence* (NEC Immune Profiler suite) to conduct a faster genetic decoding of the novel coronavirus, aiming to *accelerate* the development of a vaccine to quell the pandemic.
- NEC completed its analysis of the *genetic structure in a month*, far less time than typically needed to decode a virus.
- Using proprietary AI designed to combat cancer, NEC located several genes in the coronavirus that could help activate patients' immune systems. It also identified a combination of genes less likely to be affected by mutations.

NEC Healthcare Digital Transformation Strategy

Future vision Realization of a world in which a wide range of healthcare data is used under individual initiative to extend healthy life expectancy

Collection of health information through co-creation with partners.

Health advancement

- Changes in physical condition
- Diet, exercise, and sleep
- Health checks/vaccinations

Medical treatment

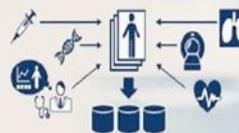

- Patient review/healthcare interviews
- Physical findings
- Medical exams

Prognosis/nursing care

- Supervised administration
- Rehabilitation records
- Nursing care/supervision

The integration and structuration of healthcare data. Converge to value.

NEC

Creating new value through co-creation with partners.

Healthcare providers

Improved quality of diagnosis and improved efficiency of healthcare operations.

Private corporations/insurers

Early detection of diseases

Citizens

Preventive advice for self-medication.

Quality of Life

The key is to extend healthy life expectancy

A sustainable longevity society made possible with digital healthcare

Digital Transformation of Healthcare

Smart Healthcare utilising IOT and AI for efficiency and effectiveness of healthcare services.

Biometrics for Seamless Patient Registration, Admission and monitoring

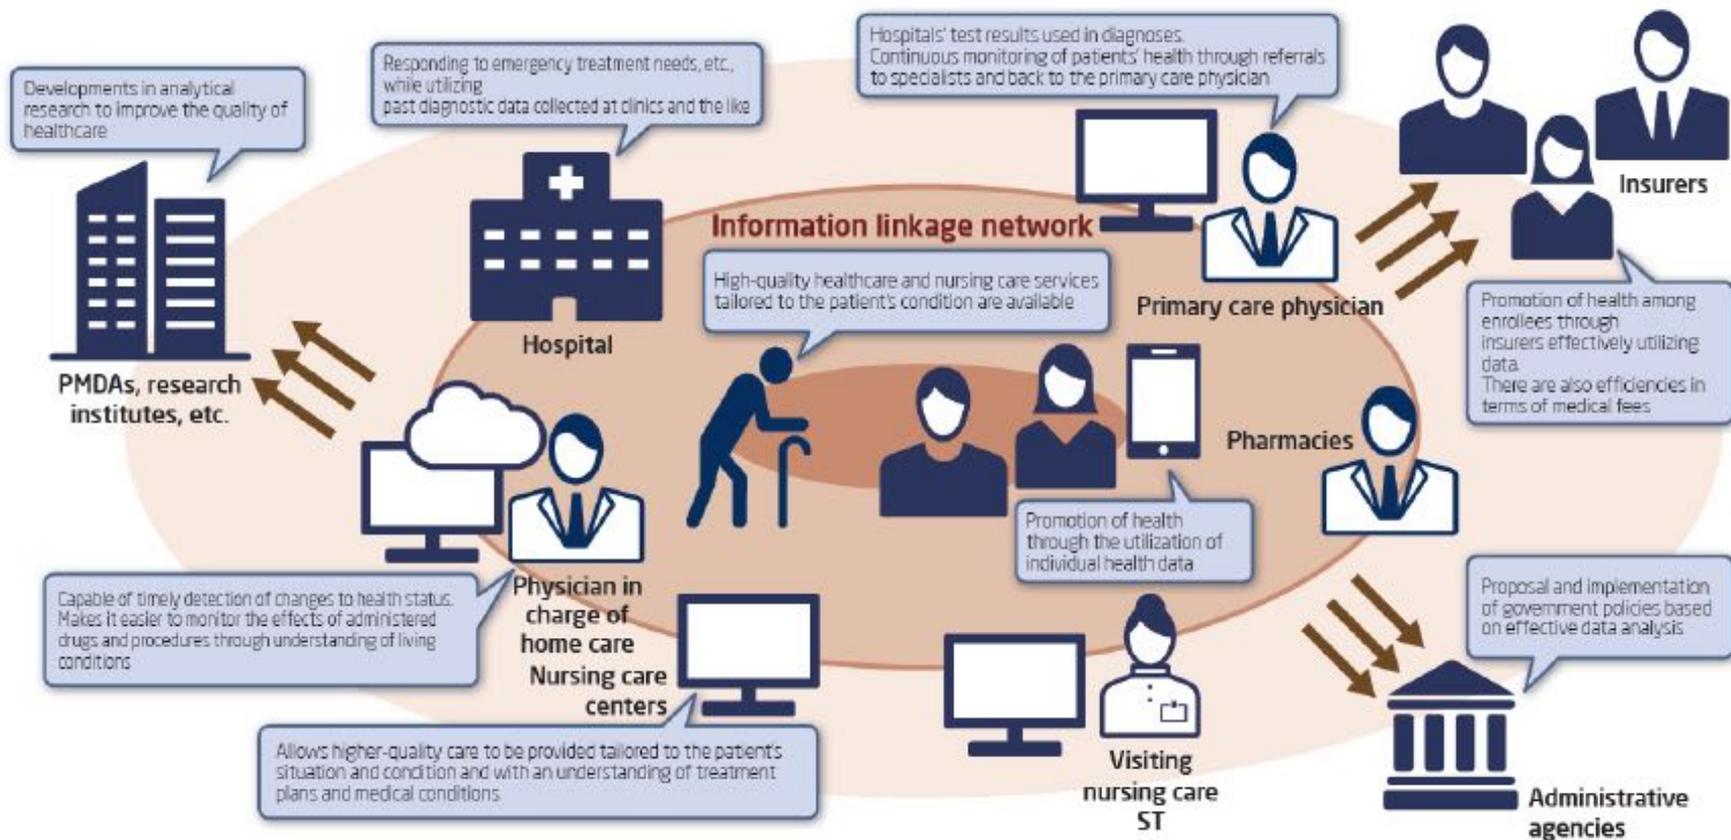

Gaze Technology

- Call for service with your eyes

Healthcare Digital Network

Utilization of ICT aimed at improving the quality of healthcare and nursing care services and ensuring a sustainable social insurance system

HEALTHCARE INDUSTRY TRANSFORMATION MAP

VISION

Championing a healthy nation with our people - to live well, live long & with peace of mind

LONG TERM TRENDS IN HEALTHCARE

Ageing population

Increasing chronic disease burden

Slower workforce growth

Rising healthcare costs

CURRENT HEALTHCARE WORKFORCE AND FACILITIES

96,000 PEOPLE

Nurses, Doctors, Administrative staff, Allied health professionals (AHPs), Ancillary staff, Support care staff, Pharmacists, Dentists

PRIMARY CARE

2,991

Polyclinics, GP and dental clinics

ACUTE CARE

26

Public and private hospitals

COMMUNITY CARE

189

Community hospitals, nursing homes, day care centres, home care providers

OUR STRATEGIES

BEYOND HEALTHCARE TO HEALTH

To help and support Singaporeans to lead healthier lives.

BEYOND HOSPITAL TO COMMUNITY

To enable Singaporeans to receive appropriate care in the community and closer to home.

BEYOND QUALITY TO VALUE

To give every Singaporean the best value, while keeping our system sustainable.

ENABLING OUR STRATEGIES

JOBS & SKILLS

To attract more locals and develop new skills for aged care

- Provide multiple pathways to attract mid-career locals to enter healthcare
- Develop community nursing and provide more upgrading opportunities for community nurses
- Redesign jobs and enhance skills upgrading to build a future-ready workforce

PRODUCTIVITY

Work better, work smarter

- Streamline workflows for healthcare workers to focus more on patient care
- Scale assistive equipment and cost-effective technologies to lighten work especially for the ageing workforce

INNOVATION

Partner with industry to develop tomorrow's solutions

- Introduce innovative and patient-centric solutions, and deploy in new hospitals
- Encourage meaningful private sector participation in service delivery through the Primary Care Network scheme for GPs and Build-Own-Lease for Nursing Homes
- Use technology to empower patients in care
- Digitise medical records & connect all healthcare providers

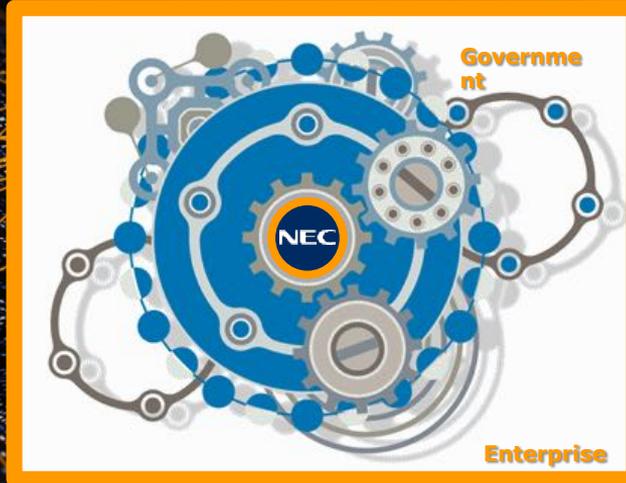

OUTCOMES

BETTER SKILLS, BETTER WORK, BETTER CARE

Case-Study: Co-Creation of Healthcare Solutions

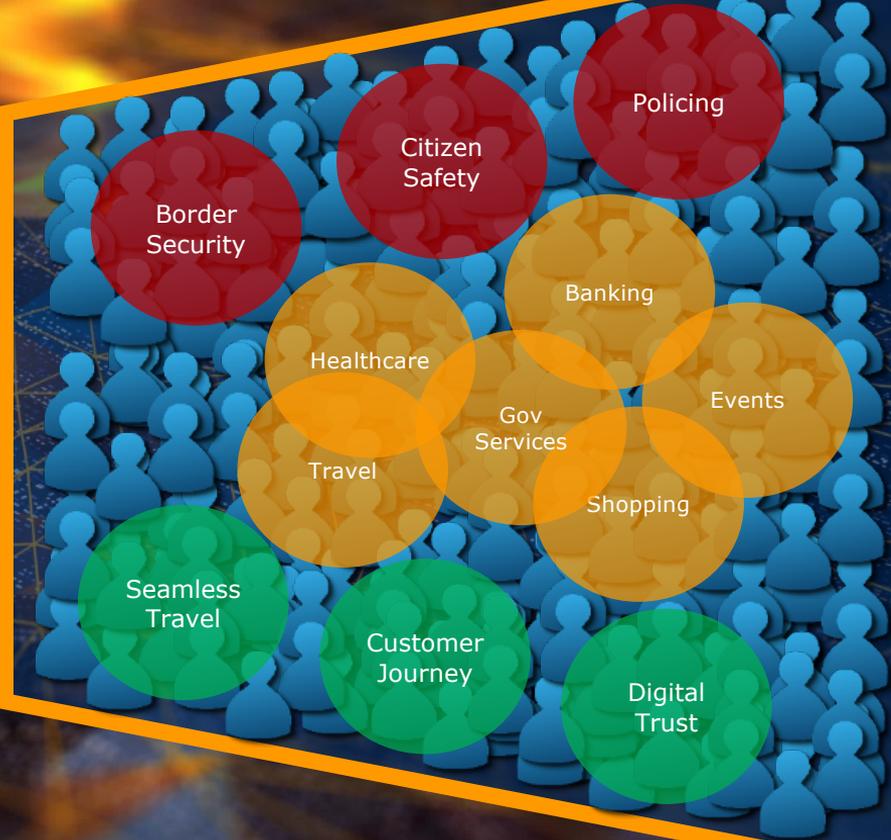

Convergence of DX/CX

Unified Security

Unified Experience

Single Identity

Bringing Safety and Security to Citizens and Businesses
