AS WE LAUNCH A NEW PROGRAMME TO EMPOWER FUTURE WOMEN LEADERS IN STEM

Together with the President of Singapore, Halimah Yacob, and President of Nanyang Technological University (NTU), Subra Suresh, we will launch a new program that is supported by the Ministry of Education to empower future woman leaders in science, technology, engineering, and mathematics (STEM).

We want the next generation of women to view themselves as agents of change as they utilise their STEM education to create innovative discoveries and solutions to make the world a better place.

**GUEST-OF-HONOUR
PRESIDENT HALIMAH YACOB**
