RESEARCH GRAND ROUNDS

Optimising the Academia-Industry Interface to Drive Research Performance

Could academia and pharmaceutical industry work together to accelerate research and improve clinical care outcomes?

Join our speakers as they share strategies and perspectives of a pharmaceutical company, and discuss ways to create successful collaborations between the industry and academic institutions.

Our speakers will also delve into the significance of operational excellence in terms of clinical trials and metrics, which are crucial for a successful research study.

Wednesday, 16 March 2022
12:30pm to 1:30pm
via Zoom Webinar
