Pushing the Boundary of Hypertension Care in Primary Care: Precise Diagnosis and Monitoring

How can healthcare professionals cope with the rising prevalence of hypertension in Singapore?

Join Dr Ng Chirk Jenn as he shares about how pragmatic research that combines technology with clinical and behavioural data can help in decision making and provide better hypertension care for patients.

He will also delve into the real-world challenges of potential solution such as wearable devices create in terms of data interpretations and accessibility, which are crucial for doctors and nurses to make fast and accurate diagnosis and personalizing the treatment plan.

Wednesday, 27 July 2022

12:30pm to 1:30pm

via Zoom Webinar
