

COVID-19: Looking Back and Looking Forward

A 3-Part Webinar Series

The world's attention is understandably currently focused on how to manage the COVID-19 pandemic. However, in this webinar series, we shift the focus to an examination of the broader question of *WHY* such a virus originated in the first place. We describe current frameworks and strategies that help identify risks and current tools in our arsenal that can be used to mitigate risks. We also pose the question 'how can we use our understanding and available tools to prevent future occurrences?'

Webinar 1:

The role of evolutionary and ecological factors in pandemics like COVID-19

2 Jun 2020, SGT 4pm – 5pm, Zoom

Webinar 2:

Employing a One Health framework to examine emerging infectious diseases in the context of Global Health

9 Jun 2020, SGT 4pm – 5pm, Zoom

Webinar 3:

Fast forward: How to prevent future pandemics?

16 Jun 2020, SGT 4pm – 5pm, Zoom
